Annual Leave Accrual Schedule

Document ID	TBL-LEAVE-ACCRUAL
Version	1.0
Effective date	1 January 2025
Applies to	All offices
Owner	People Team
Classification	Internal

This schedule sets out how annual leave is earned under the Global Leave Policy. Regional addenda may set different rates for some offices.

1. Accrual rates

Length of service	Days earned per month	Days earned per full year
Less than 2 years	1.5	18
2 years to less than 5 years	1.75	21
5 years or more	2.0	24

2. How accrual works

- Annual leave is credited on the last calendar day of each month.
- Length of service is measured from the joining date to the first day of the month being credited.
- When an employee reaches a new service band, the new rate applies from the first full month after the anniversary.
- Employees who join after the 15th day of a month start earning from the following month.
- Leave is credited in days and can include half days, for example 1.75 days.

3. Worked example

An employee who joined on 10 March 2023 reaches 2 years of service on 10 March 2025. They earn 1.5 days for March 2025 and 1.75 days from April 2025 onwards, which is 21 days in a full year at that rate.

4. Leaving the company

Accrued but unused annual leave is paid out when an employee leaves, unless local law requires something different. Leave taken in excess of the amount accrued may be deducted from final pay.
